### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For at least claims 1, 15 and 16, the limitations of claims: “(input means for) inputting the print job, the print job containing a plurality of printing objects; and (adjustment means) for specifying a user who instructs the print job according to print job information and adjusting an object of the plurality of printing objects on the basis of *the user profile* of the specified user” (added emphasis) renders the claims failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, because the print job is already containing a plurality of printing objects from the user’s instructions, why adjustment means adjusting a printing object of the print job on the basis of the user profile while the print job does not including or requiring printing instruction for allowing to adjust the any object of the plurality of printing objects from the user profile.
